

3005. Count Elements With Maximum Frequency

Easy  Topics  Companies  Hint

You are given an array `nums` consisting of **positive** integers.

Return the **total frequencies** of elements in `nums` such that those elements all have the **maximum** frequency.

The **frequency** of an element is the number of occurrences of that element in the array.

Example 1:

Input: `nums = [1,2,2,3,1,4]`

Output: 4

Explanation: The elements 1 and 2 have a frequency of 2 which is the maximum frequency in the array.

So the number of elements in the array with maximum frequency is 4.

Example 2:

Input: `nums = [1,2,3,4,5]`

Output: 5

Explanation: All elements of the array have a frequency of 1 which is the maximum.

So the number of elements in the array with maximum frequency is 5.

Constraints:

- `1 <= nums.length <= 100`
- `1 <= nums[i] <= 100`
