

Solution

Approach: Using `UPDATE` and `CASE...WHEN` [Accepted]

Algorithm

To dynamically set a value to a column, we can use `UPDATE` statement together when `CASE...WHEN...` flow control statement.

MySQL

```
UPDATE salary
SET
    sex = CASE sex
        WHEN 'm' THEN 'f'
        ELSE 'm'
    END;
```
