14. Longest Common Prefix

Easy   🏷 Topics   🔒 Companies

Write a function to find the longest common prefix string amongst an array of strings.

If there is no common prefix, return an empty string `""`.

Example 1:

> **Input:** strs = ["flower","flow","flight"]
> **Output:** "fl"

Example 2:

> **Input:** strs = ["dog","racecar","car"]
> **Output:** ""
> **Explanation:** There is no common prefix among the input strings.

Constraints:

- `1 <= strs.length <= 200`
- `0 <= strs[i].length <= 200`
- `strs[i]` consists of only lowercase English letters if it is non-empty.
